▶ **High Security -** Mutual authentication, data encryption and unique 32-bit serial number.

HID

FlexSmart® MIFARE®/Prox

ACCESS interoperability.

Combine the benefits of proven Indala Proximity and HID FlexSmart MIFARE contactless smart card technology in one card. The card can be used for diverse applications such as access control, cashless vending, public transportation, event ticketing, customer loyalty and photo ID cards. Featuring exclusive FlexSecur® security technology, the card provides an added level of access system security through a verification process at the reader. Unique to the HID Indala product line, FlexSecur screens out unauthorized cards prior to sending card data to the host system.

Manufactured to the highest quality standards, Indala Proximity and MIFARE credentials have the memory structure and capacity to store multiple applications on a single credential. The data is protected with encryption keys used in the mutual authentication process. Therefore, no important data will be shared until the card and reader have been authenticated to each other.

When security and performance count most, HID's FlexSmart MIFARE cards can be produced with visual security and anti-counterfeiting features such as holograms, ultra-violet fluorescent inks, micro-printing or a custom logo to quickly and easily identify genuine cards.

Key Features
▶ **Proven, Reliable Technology -** Offers extremely consistent read range. Unaffected by body shielding or variable environmental conditions, even when close to keys and coins.
▶ **Multiple Memory Types -** Available in MIFARE 1K and 4K.
▶ **True Credit Card Thickness -** Use with all direct image and thermal transfer printers.
